## I HAVE JUST RETURNED

From a five weeks trip from New York. The last two weeks of my trip were devoted to buying and looking at ready-made garments for ladies, misses and children. I know this subject is one that will interest the female portion of our population, and I am only sorry that each and every one that is interested in Suits, Coats, Skirts, Raincoats, etc., could not be with me to see the many hundreds of lines and to see how I select the very best from each line. There are probably 15 good lines shown in Maysville by salesmen. Think of that when I tell you that as many as 50 salesmen have called on me in our New York office in a single morning. FACTS WILL OUT. Goods are arriving daily and by next week we expect to have a good showing—enough to convince you that buying goods in September when the new styles come out is something to be proud of. With the exception of four numbers in staple suits there will be NO TWO SUITS ALIKE in our stock, something I feel safe in saying does not occur in another store in the United States in a town as large as Maysville.

I also wish to add that we have secured the exclusive sale of Fern Bros. & Stuman of Fifth avenue line of Suits, prices from \$29 to \$55, the highest class of merchandise ever shown in Maysville. Goods arriving daily. Announcement of our opening later, but a visit at any time will be appreciated. MILLARD MERZ.

KINGS OF LOW PRICES. MERZ BROS. PROPS. BEE HIVE.

## HATS....

The ready-to-wear kind now on sale, the prettiest line we have ever shown. Variety of styles the largest. Just the things for early fall. In order to make this season the largest we have ever had in our Millinery Department we have made the prices very low.

According to the official report, Uncle Sam has 1,958 Bluejackets and 325 Marines in Cuban waters—enough to whip the whole darn Cuban outfit.

There's a "Special Correspondent" out at Spokane, Washington, who is contributing largely of postage stamps, envelopes, manifold and "gray matter" to the waste-basket, and it seems to be impossible to call him off.

The Board of Public Stupidity at Cincinnati is still looking for some one to run their Water-works. What the People really need is a Hydraulic Engineer who knows how to pump water; what the Board wants is any old kind of an Engineer who can pump politics.

The Shaw idea seems to be that the American workman is doubly blessed. He is free to pay \$15 for a watch in the United States or go to Europe and buy it for \$12.50.—Courier-Journal.

Certainly. And when your \$25-a-week American watchmaker finds his wages pared down to the \$7.50-a-week scale of Switzerland, the American workingman will buy his chronometers at home just as cheap as he now buys them in Geneva.

The present phenomenal prosperity has been won under a Tariff which was made to protect the interests of the American producer, business man, wage-worker and the farmer alike.

There appears to be about a bushel-and-a-half of trouble on hand for the Frankfort Machine, in explaining how the killing of an inmate came about by the humane attendants at the Lexington Lunatic Asylum.

The Hon. JOHN SHARPE WILLIAMS, Democratic leader in the House, said in one of his speeches—

"We are simply anti-Protectionists. We are not Free Traders. Our purpose is revenue. We would not inaugurate Protectionism where it does not exist. We would remove it wherever it does exist, as rapidly as it can safely be done."

"Safely" done is good. But, JOHN, if Protection is the evil you uns paint it, wherein lies the danger of removing it all in a lump? Why must you move "safely" in the matter?

While I was out of town the other day Editor ALTMAYER let fly this dornick—

"It is usually the hired help that watch the clock that complain most of bad luck, hard times and lack of appreciation on the part of their employers. The kind who don't watch the clock have little time to complain, and even less inclination to do so."

This sockdolager hit the double-breasted brass railing inclosing the Editorial Gocart, caromed on the Proof Press, ricocheted across the Composing Room, describing the entire rhombohedron and scalenohedron system in its flight, until it took a fall out of the boiler and lay prone at the feet of the lyepot.

## Better Spices

For your canning and pickling recipes you need the kind of spices you get here. Spices are drugs, and we buy them as carefully as we do any other item of drugs. We buy spices on the basis of quality. Our first effort is to get the very best; our next to get them as cheaply as possible. You will find that these good spices go so much farther and give so much better results as to be far more economical than the grade that is cheap in price only.

If your printed matter is the best obtainable. The printing you use is always your business representative, and like any other salesman, should be well dressed and create a favorable impression even before any argument is advanced. A Queen of ancient Egypt wore over the light blue head covering fashionable for her sex an elaborate headdress in place of a crown. This was made in the form of some symbolic animal or else it bore a symbol—a bird, the heads of serpents or the horns of oxen.

In spite of denials, it is now positively affirmed that Edna Goodrich has made an affidavit, which is in the hands of Jerome, in which she tells of introducing Evelyn Nesbitt to Stanford White and relates every incident of a mutual acquaintance that lasted for months. The prosecution regards her story as an extremely strong link in the evidence against Thaw.

Hongkong is an island situated in the China Sea, off the coast of China, from which it is separated by a narrow strait. It was yielded to Great Britain by treaty in 1842. The roadstead has a well protected anchorage. Victoria, the capital (itself commonly called Hongkong) is situated on a magnificent bay of the same name, setting up into the North side of the island. Hongkong is a great center of the foreign trade of China. Total exports are roughly estimated at \$175,000,000 and imports at \$100,000,000. As a British colony on Chinese soil, it is the most important in its political and defensive position and is the headquarters of the military, naval and mercantile establishments. Dr. J. H. Merriam, D.D., of Oxford University, England, has recently said of it: "It is indeed a marvelous work; it is difficult to conceive of a dictionary more exhaustive and complete. The Election Commissioners are to be congratulated in having secured the services of "Dr." J. Phister Wallace of Chicago to assist in holding the election in the Fourth Ward. "Doc" has been a resident of the "Windy City" for eight years or more.

The raft spider gets its name from its habit of building a raft of dry leaves and other light materials, fastened together by threads of silk, in order to pursue its prey in water.

Mineral products are so abundant and varied in the United States that the figures almost stagger belief. Recent tests made by Government mineralogists at Portland, Ore., of the black sands of the Snake and Columbia rivers show them to be of good value, containing gold, platinum, and other metals in paying quantities. Besides, they are rich in iron of the best sort for making the finest of spring steel. Nothing has been found that excels it for hair-springs for watches and edged tools of high grade.

The fiber paper on which currency notes are printed is manufactured especially for the Government by a Massachusetts concern. It costs 43 cents a pound. The short silk threads, which are its most distinguishing marks, are introduced at a certain point in a manner unknown outside the factory, thus forming the greatest insurance against successful counterfeiting. When shipped from the paper mill each sheet has been counted twice. Yet, upon their receipt at Washington, all the sheets are again counted twice and examined for flaws.
